Viewing Guide

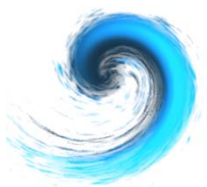

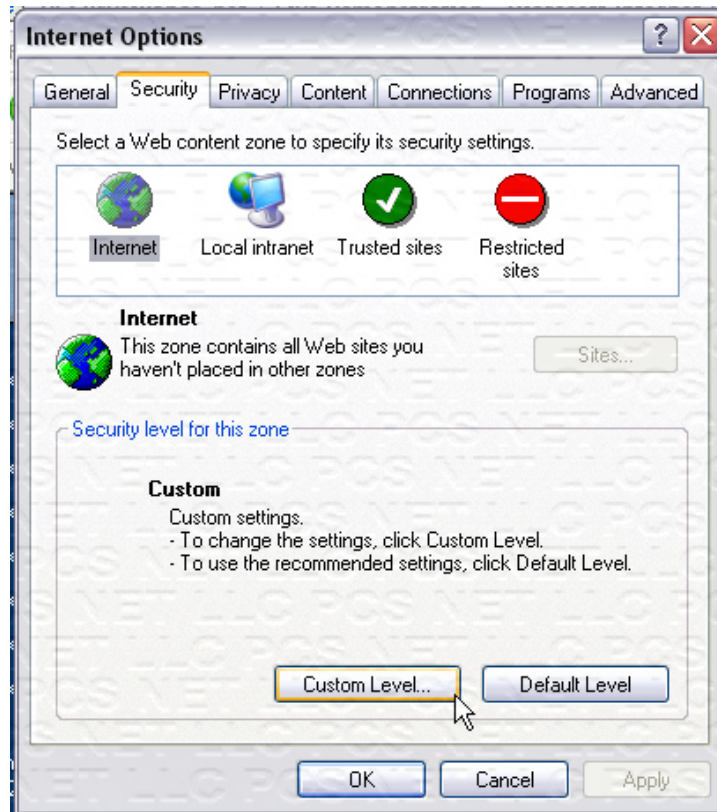

To View any of the cameras you need to use Internet Explorer. And follow How to enable ActiveX Controls in Microsoft Internet Explorer steps.

## How to enable ActiveX Controls in Microsoft Internet Explorer

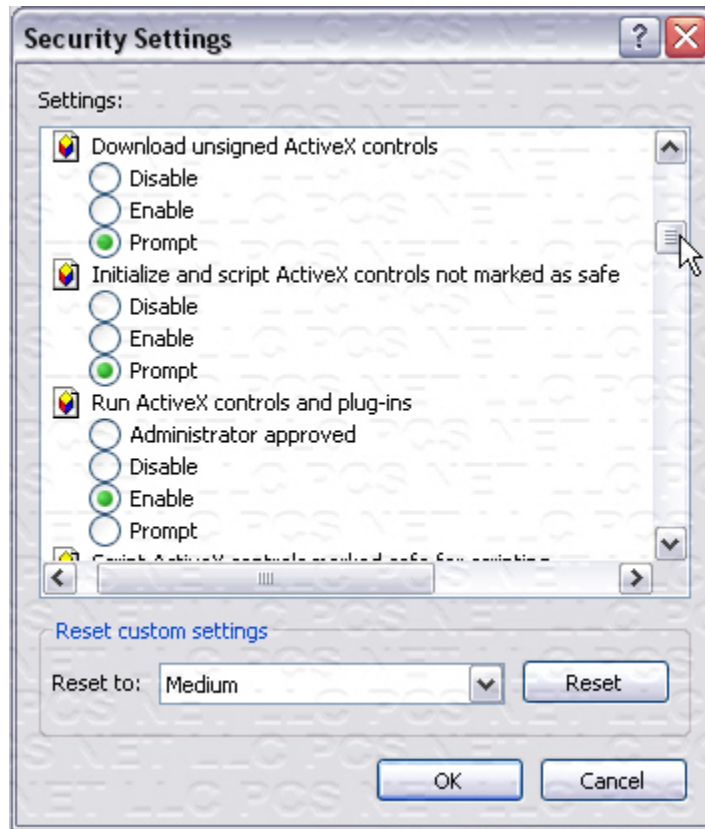

**Step 1:** Go to the Tools menu, and select Internet Options.

**Step 2:** Once the Internet Options window appears, select the Security tab, and click Custom Level.

**Step 3:** Scroll down to the ActiveX controls and plug-ins group, and ensure that all ActiveX options are set to either "Enable" or "Prompt". Since the remote viewing software is published in an unsigned state, please make certain that the options "Download unsigned ActiveX controls" and "Initialize and Script ActiveX controls not marked as safe" are set to "Prompt". This way, when you visit the demo, you will be asked if you want to install the software.

**Step 4:** Click "OK" until you return to the browser.

**Step 5:** Direct your browser to the target web address (DVR, IP Camera/Module, etc), Enter your user name and password to log in. You may be asked to install the ActiveX viewing software OK/Install when prompted. As soon as your computer finishes downloading and installing the ActiveX remote viewing software. Then log click the VIEW button on the screen. you should see video streaming from the system.

**Step 6:** Control the camera by clicking on the picture to move camera to desired location. You can also use your scroll wheel on your mouse to Zoom In and Out.
